How Applied Imaging and NetSmart Plus Helped

Barton selected Applied Imaging to revamp and streamline it's entire communication and information technology system. After analyzing the work flow needs of the 12 staff members, all desktop printers were replaced with one centralized, networked multifunction copier. All service and supplies are provided through Applied Imaging's PrintSmart solution and Barton just pays one low cost per page. Additionally, a managed network services solution was implemented through Applied Imaging's NetSmart Plus division. This assured Barton of maximum network uptime through 24/7 proactive monitoring, user and email account management, SPAM filtering management and more,

The Benefits

- Fully functioning network for timely information to be provided to insurance companies, resulting in faster payments received
- Frees up doctors and office staff to focus on the patient experience
- One point of contact simplifies all communication
- Full or part-time IT personnel not required and access to vCIO if needed
- Significant reduction in printing and copying costs
- Transitioning from paper and filing cabinets to a paperless digital system

About Applied Imaging and NetSmart PLUS

Since 1987, Applied Imaging has been providing Midwest businesses with world-class products, service and support. This helps to maximize uptime, increase productivity, and improve efficiency. With almost 4000 workstations and servers managed, NetSmart Plus, powered by Applied Imaging has the experience and power to have your back and give your business peace of mind. When your network quits working, so does your staff. With NetSmart Plus, you're one click or call away from help to swiftly resolve your I.T. challenges.

Customer Barton Chiropractic

Industry Healthcare

Services Used NetSmart Plus PrintSmart

"The bottom line benefit with Applied Imaging is priceless. They've come through in areas we didn't even know they could help. Their people walked us through a step by step process to the point we're more streamlined and more technologically advanced and don't have to worry about I.T. stuff. It allows me to be a doctor which is why I'm here." -Dr. Matthew Barton Partner, Barton Chiropractic
